House of wood and stone rehabilitated, built over the ancient "bodega" (winery) -now restaurant-, from which it is possible to be observed the historical center of Elciego, including wineries and a grandstand view of the new building at "Bodegas Marqués de Riscal", designed by Frank Gehry. There are four cosy double rooms, two of them with an attic, each with its own bathroom, central heating and air conditioning, a well equipped kitchen, comfortable lounge with dining area, TV, DVD, CD, a selection of board games and a library. Our Restaurant "LA CUEVA" is located in the low part of the House and it is in interior of one of the traditional familiar wineries called CALADOS (cellars). This "Calado" was first documented in 1.583, although it is probably of more ancient origin, in which year Philip II awarded to Elciego the "Carta de Privilegio", when it became a town in its own right an a census was held. Entry to the restaurant is through the Sala Degustation and, down into the "Calado", excavated from solid rock, where a meal may be enjoyed in one of the four rooms, LA CATA (the tasting room), LA CUBA (the barrel), EL BOTELLERO (the bottle store) and 980 CÁNTARAS (an old wine vat, 1 cántara=16 litres).

Actividades

Possibility of making meals or suppers combined with wine tasting and accompanied by explanations of a specialistic technician.
